**To register call 800-TEMPLE-MED
or visit jeanesbariatric.com**

Mary K - Today
Lost 120 lbs.

Before Surgery

Bariatric Program
TEMPLE HEALTH

Bariatric surgery can be safe and effective in helping some men and women lose weight and reduce health risks.^{1,2} The range for weight loss in some studies is from approximately 29% to 87% of excess body weight after surgery,⁴⁻¹⁰ but the average excess weight loss is about 50%. Your results may be different and amount of excess weight loss will vary with the type of bariatric operation performed. Ask your doctor what to expect and if bariatric surgery is right for you. ¹ *Obes Surg.* 2010;20:776-790. ² *Br J Surg.* 2010;97:877-883. ³ *N Engl J Med.* 2009;361:445-454. ⁴ *Am J Med.* 2009;122(3):248-256. ⁵ *Ann Surg.* 2013;257(5):791-7. ⁶ *Ann Surg.* 2011;254(3):410-22. ⁷ *J Intern Med.* 2013;273(3):219-34. ⁸ *Endocr Pract.* 2008;14(S1):1-83. ⁹ *J Am Coll Surg.* 2005;200:593-604. ¹⁰ *J Am A.* 2004;292:1724-1737.

Temple Health refers to the health, education and research activities carried out by the affiliates of Temple University Health System (TUHS) and by the Lewis Katz School of Medicine at Temple University. TUHS neither provides nor controls the provision of health care. All health care is provided by its member organizations or independent health care providers affiliated with TUHS member organizations. Each TUHS member organization is owned and operated pursuant to its governing documents.

Non-discrimination notice:

Temple University Hospital does not exclude participation in, and no one is denied the benefits of, the delivery of quality medical care on the basis of race, religious creed, sex, sexual orientation, gender identity, disability, age, ancestry, color, national origin, physical ability, or source of payment.
